

Missouri Statewide Search Instructions

The initial search in the state of Missouri does not require a fingerprint card from the applicant. However, at certain times after the initial search is conducted by the State Patrol, results may yield multiple Name/Date of birth combinations with a criminal hit. Due to this, a fingerprint card will be required in order to complete the background request.

The applicant can obtain this by visiting their local police department or highway patrol branch office and indicating that they need to be fingerprinted to be submitted for a criminal employment background check.

If the applicant is unable to obtain this documentation from a policing authority, please email First Advantage at FishersClinicalServicesShipping@fadv.com and request an Missouri fingerprint card.

Please have the original fingerprint card mailed to:

First Advantage
